A Tribute to Iconic Furniture Designers

Particular design styles wouldn't exist without the designers behind each movement. The past century has seen dozens, if not hundreds, of notable furniture designers, people who have been at the forefront of design trends, or who have fashioned their own unique styles. This is our tribute to these international and Australian designers.

Here at Brosa, we love to celebrate furniture designers. Not only do they push the boundaries on furniture design and production, they use their considerable expertise to create top quality

Here at Brosa, we love to celebrate furniture designers. Not only do they push the boundaries on furniture design and production, they use their considerable expertise to create top quality pieces known for their craftsmanship, strength and durability. As a result, designer furniture pieces can be – and often are – considered works of art.

Why have we created this resource? Because we want to give furniture designers (including ours) their due respect. Furniture designers toil hard to create new designs and innovations. Their efforts are rewarded when their designs – their intellectual property – are embraced and respected by the community.

Australian furniture designers make us proud by enriching our local art culture. Their original pieces are designed with top-quality craftsmanship and are made to last. But it's not just the quality of a designer piece we're interested in. Australian furniture designers rely on their authentic pieces for their income, while purchasers can expect an appreciation in the value of their furniture.

Buy from local designers, and you're investing in the future of the local design community. You're protecting their intellectual property. And more often than not, you're also investing in a particular set of values, whether they are using organic or eco-friendly materials or engaging in local production.

Support and interest in the industry translate into more innovation and increased production. And we're all better off for that. So to honour furniture designers, we've include a list of some of the most renowned designers in the industry, from overseas as well as at home. These designers' unique styles inspire many contemporary furniture designers, which you'll see in the [designer furniture you'll find at Brosa](#).

Johnny Chamaki

Johnny Chamaki is an award-winning designer with a studio in Sydney. Chamaki showed promise for art and design when he began selling artworks to his friends' parents at just 10 years old.

Fascinated by plants, Chamaki's contemporary works are inspired by nature and unique geographical locations. One of his most famous furniture design ranges, the Outlaw Series, borrows heavily from Ned Kelly symbolism and folklore.
